

July 26, 2021

TO: Tehama County Board of Education
Tehama County School Districts

Tehama County Board of Supervisors
Tehama County Public Health

This letter serves as official notice that we, the parents listed in the attachment, do not consent to the items below. We trust you'll take them into account for this 2021-2022 school year.

1. MASKS

We do not consent to our children wearing masks at school for several reasons. Please note that while the state is currently mandating masks, on Tuesday, July 13, ***CDPH made the decision to allow local school districts to decide how to enforce the mask mandates.***

- a. Multiple studies (as per the CDC's own policy review in May 2020) have found that there is no evidence of reduced virus infection when a mask is worn. Both the CDC and the CDPH have noted that there is, in fact, possibility of increased risk of infection when masks are worn improperly. A 2015 study in Vietnam also found a two-layer cloth mask yields a 13 times higher risk of viral infection (due to build up of virus on the mask). Considering bacteria is 50x larger in size than virus particles, children being forced to wear masks increases their risk of becoming sick from many other illnesses.
- b. Studies indicate the carbon dioxide increase is significant, causing excessive CO₂ in the bloodstream (hypercapnia), which causes cognitive impairment, confusion, loss of consciousness, and even asphyxiation. Journal of the American Medical Association study attached. <https://jamanetwork.com/journals/jamapediatrics/fullarticle/2781743>

They found that within 3 minutes of putting on a mask, a 7 year old's CO₂ level was 25,000 parts per million. CO₂ for adults should not exceed 10,000 parts per million according to the Minnesota Dept of Health. A full school day of this hypercapnia can cause headaches and other health issues and is unacceptable.

Another study measured blood oxygenation before and after surgeries in 53 surgeons. Researchers found the mask reduced the blood oxygen levels significantly, and the longer the duration of wearing the mask, the greater the drop in blood oxygen levels.

- c. Children have been repeatedly shown not to be drivers of this contagion. It is well accepted that children have a statistically zero chance of dying from COVID. The CDC shows the K-12 mortality rate from or with COVID is .00003. Any intervention, especially one that is prophylactic, must cause fewer harms to the recipient than the infection. Since children have the lowest death rate from COVID infection, the cost-benefit of requiring children to wear an investigational face-covering with emerging safety issues is especially difficult to justify.
- d. The mandatory mouth mask in schools is a major threat to a child's development. It ignores the essential needs of a growing child. The well-being of children and young people is highly dependent on the emotional connection with others. Masks create a threatening and unsafe environment, where emotional connection becomes difficult.

2. MEDICAL PROCEDURES: TESTING & MRNA INJECTIONS

We do not consent to any covid testing or vaccine administration at school. Our medical procedures will solely be handled by parents when our children are in our own custody. We will choose our medical locations as well as our preferred provider.

a. TESTING

Covid testing is not proven safe enough for our children. The upper nasal area is risky, being so close to the brain. And many of the PCR swabs are sterilized with Ethylene Oxide, a central nervous system irritant and inhaled carcinogen; noted on packaging.

b. MRNA INJECTIONS (aka COVID-19 Vaccine)

- i. MRNA injections have never been used as a vaccine and should not be used on our children, nonetheless, parents will reserve the right to decide whether our child should be subject to this injection.
- ii. MRNA injections DO NOT prevent transmission and may cause other health issues.
- iii. "The Vaccines are unapproved, inadequately tested, experimental and dangerous biological agents that have the potential to cause substantially greater harm than the SARS-CoV-2 virus and the COVID-19 disease itself." *Per legal action filed to protect children from receiving the MRNA injection.*

3. ON-CAMPUS

We do not consent to remain off school grounds. We retain our responsibility for our children, and that sometimes includes our physical presence.

We will not fail to take the maximum action permissible under the law against any organization or individual that either (a) puts pressure on our children to implement measures contrary to our demands or (b) applies retaliatory disciplinary action against our children.

Signing Parents Attached, including children's school name and 2021 grade level.

Information about our concerns and comments from parents are available at:
